OUR SERVICES

KNETCO plays a key role in supporting client's requirements by offering a vast range of high caliber services with our partners and with the quantity of operations has enabled us to provide competitive price services with the best quality. We with stand at most professional services to our customer by closely working with our committed partners for turnkey, solutions & services below:

- Wired Communication
- Wireless Communication
- GPON
- GSM & Wireless Domain
- Security & ELV

- Datacenter, Cloud & Cybersecurity
- Technical Manpower Supply
- Agency Representation
- Low Power Electrical
- Specialized Military Solutions
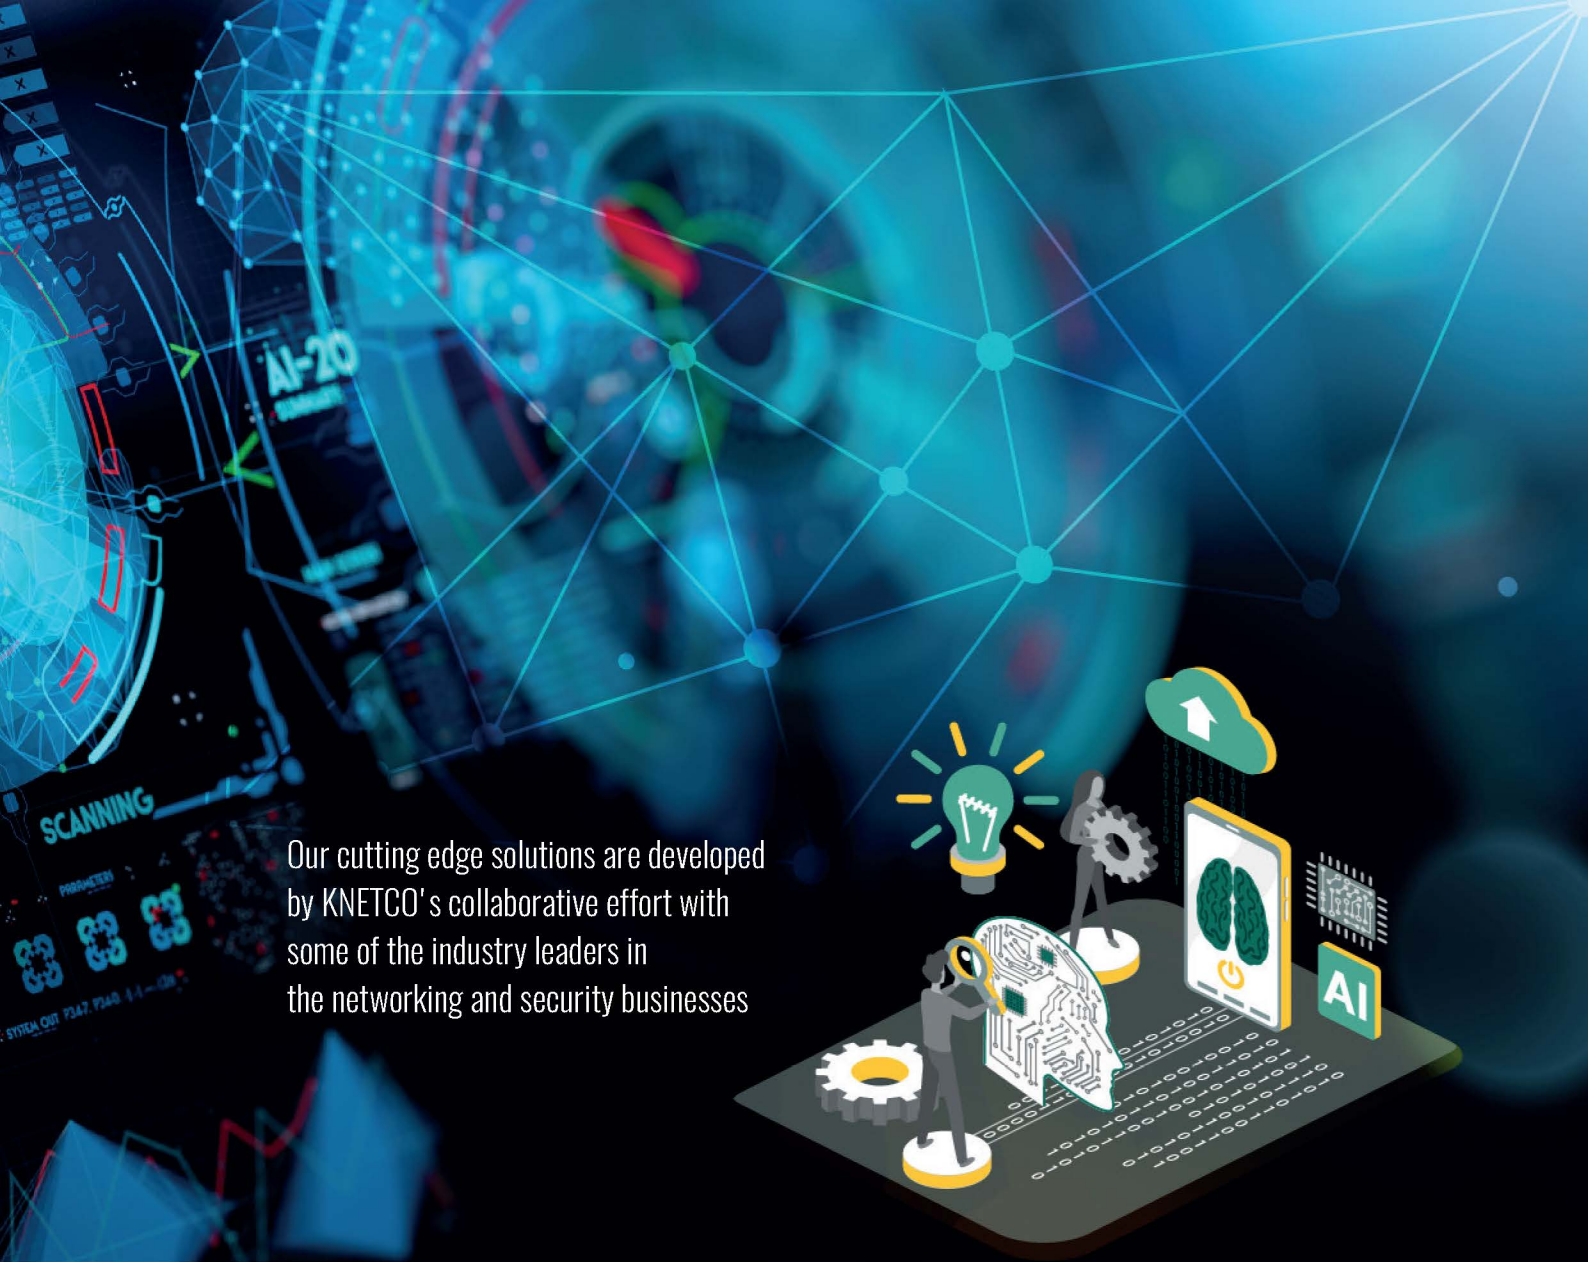

Our cutting edge solutions are developed by KNETCO's collaborative effort with some of the industry leaders in the networking and security businesses

Wired Communication	Wireless Communication	GPON
GSM & Wireless Domain	Security & ELV	Datacenter, Cloud & Cybersecurity
Technical Manpower Supply	Low Power Electrical	Specialized Military Solutions

Wired Communication

- Engineering Survey & Design.
- Optical Transmission Network Design.
- OSP & ISP Construction.
- Operations & Maintenance.
- Turnkey Project Management.
- Manpower Consultancy & Services.
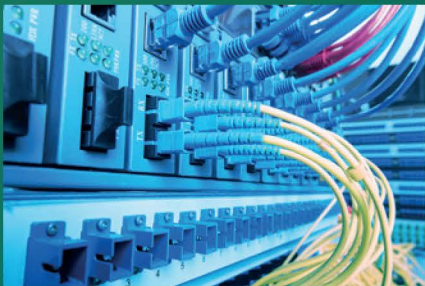

Wireless Communication

- Background of Wireless Communication
- Communication Technology
- Networking and Mobile IP
- Local Area Networks
- Personal Area Networks
- Metropolitan Area Networks
- Wide Area Networks

GPON

- Optical Transmission Design - SDH & DWDM.
- High Capacity Switching & Transmission Systems.
- DSL for Broadband Connectivity.
- Network Construction.
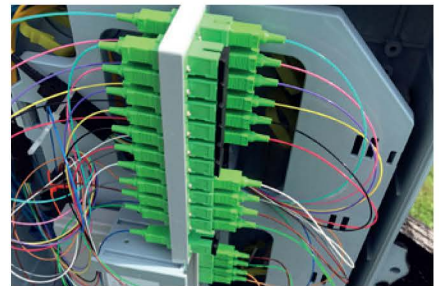

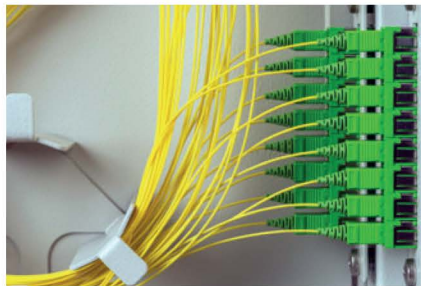

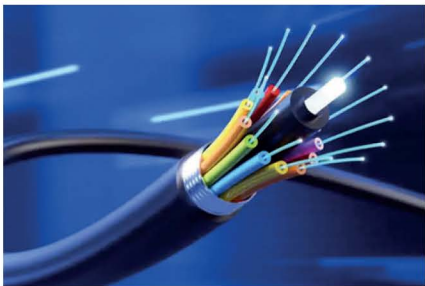

GSM & Wireless Domain

- LTE, 5G Upgrade
- BBU commissioning and integration.
- VSWR troubleshooting
- External Alarm Testing
- Microwave XPIC/E Bond/Software & Hardware upgrade

Security & ELV

- CCTV
- Access Control System
- Physical Security.
- Drones.

Datacenter, Cloud & Cybersecurity

- Uptime Certified Datacentres
- Cloud Computing Solutions
- Cyber Security Services
- Artificial Intelligence

Technical Manpower Supply

- Highly skilled technical manpower for various projects.
- Our services can be tailored as per your needs in terms of trade specialty, work location, working hours, equipment, etc.
- Tailored to meet your schedules and budget
- We take care of all the hassles of hiring process in compliance with local labour law.

Low Power Electrical

- Electrical Solutions
- High Voltage & Low Voltage Solutions
- Electrical DB's
- Generators
- Substations
- UPS

Datacenter, Cloud & Cybersecurity

- Uptime Certified Datacentres
- Cloud Computing Solutions
- Cyber Security Services
- Artificial Intelligence

Specialized Military Solutions

- Mobile Command & Control
- Rfid
- Drones
- Visitor Management System

Specialised Security
Operation Command Center

The security operation command centre was designed
as a unified system for a Military Organization.

The solution was based on a System / subsystem architecture, this way independence and interoperation is guaranteed, and the failure of one of the subsystem will have a minimum impact on the rest of the subsystems.

Commercial off the shelf equipment, eases the implementation, the development and the maintenance of the system.

Fully scalable... from 1 camp to n camps. Each camp is be designed as a stand alone unit, so the installation of a new one does not have impact in the rest.

System: fail safe implementation / Redundancy. Since the system is very dependable on the software platform of each subsystem, it is important to have a reliable system. To implement this, a High Availability virtualized environment will be implement to guarantee the high level of reliability, availability, maintainability and safety.

A unique main PSIM (Physical Security Information Management) will be the core of all the systems. All the alarm from each camp will be shown at the Local control Room, also all the alarms will be notified to the SOC. In some special occasion the SOC will override the Local Control Room and will get the control of the Camps.

Specialized surveillance solutions for high security
installations with software enabled services

We have the expertise for mission-critical security network

OUR TIME LINE

Heading to excellence...

There are five major factors that Attributes to KNETCO's phenomenal growth in the field of telecommunications in the Middle East.
- We offer Cost-Effective Solutions.
- We deploy the latest technologies available in our business.
- We provide our customers quality products and solutions that give them maximum returns on their investments.
- Talent talent acquisition - We have always hired some of the best of engineers and technicians who are experts on whatever they do.
- Leveraging on the resources our group as a solid business entity that is trusted for quality and reliability

1998
Telecom Manpower Supply

BEGINNING

2005
Telecom Contracting Co. established & approved by Ministry of Communication

ESTABLISHED

2008
Expanding all over middle east providing solutions for wired, wireless, ELV etc.

BRANCHES

2016
Providing solutions for Military organizations pioneering in Datacenter, Cyber Security, PISM, C2, Drones, MC2

EXPERTISE

2022
Expansion in other parts of the region

EXPANSION

2030
Establishing Datacenter park & cloud solutions, Exceling in communication, Security & Artificial Intelligence

MAJOR PROJECT REFERENCES

KNETCO is your trusted partner for managing your projects - be it small or large, simple design solution or a straight forward implementation of your plan, or execution of a complex engineering project overseas. We have done them all with ease. And we have done it with some of the greatest names in the business. As they say, we are known by the company we keep.

Our services cover the entire project lifecycle, from the concept phase through to construction including commissioning and maintenance. With our extensive project experience and the approaches we have developed from the past, we are able to deliver multidisciplinary project execution with finesse to our valued customers. In order to ensure quality in our services and consistency in the implementation over wide range of our project portfolio, we have developed a comprehensive project management and delivery system with our cutting-edge software and hardware expertise that is acclaimed as first rate in the industry all over the Middle East.

We are known by the company we keep. Here's a glimpse of KNETCO's project portfolio

KNETCO QUALITY

At KNETCO, our ISO certified Quality Management System incorporates a set of proven controls, checks and balances for our processes to help us develop, deliver and support our products, installations and services with full customer satisfaction.

We have implemented a stringent quality assurance system and procedures that are internationally recognized standards and they are accepted as best practice for quality management. Certification combined with company-wide quality objectives and Six Sigma programs ensure that we have an ongoing commitment to improving product and service quality, reliability, and customer satisfaction.

Our Quality assurance Engineers put together processes that are collaborative and structured. We bring in standardization in the entire operation of KNETCO in order to create an environment of Quality which not only change-driven but also empowering.
